

EV-ME

Electrical Vehicle Mechanical Equipment

EV-ME is our electrical vehicle charger support system.

* EV-ME, when erected, is 10ft high with a 30ft length. The front of three (3) buses will fit under the 30ft frame allowing the savings of valuable space

* EV-MEs open web design allows for air passage without wind damage

* EVV-ME when ordered, will be shipped to your location for local erection

* EV-ME is made of structural steel with an epoxy coating to with stand the outside weather.
